EDUCATION

THE SCHOOL OF EVOLVING TECHNOLOGIES, Lakewood, NJ

2015 – 2017

Software, Web and Application Development Course

- Developed skills in programming fundamentals, data structure and Object Oriented Programming using Java.
- Built and designed websites with the ability to purchase and stream on demand video content; used HTML, CSS and Bootstrap. (baishamikdashlive.com)
- Created multiple web applications using JavaScript, jQuery and Ajax calls to interact with a PHP page which in turn got or stored information in a MySQL database:
 - An e-commerce site and real estate site; used PHP to populate products on the page. Included the ability to sign-in as an administrator to allow editing. Used MVC for design pattern and Bootstrap for styling.
 - A contacts application using JavaScript to populate the page and Ajax to interact with a PHP page which stored the information in a MySQL database, retrieved the contacts stored in the database and displayed it on the screen.
 - A blog site displaying users' blogs which retrieved the data from a database and displayed comments on each blog post; used jQuery and Ajax.
- Used jQuery and Ajax to interact with the API's of different sites and displayed data unique to a user's search request:
 - The Flickr API to populate pictures from Flickr to my page based on a user's search request.
 - The Google Maps API and GeoNames API where located data appears on the map with text and thumbnail images from Wikipedia based on the user's search request.
